

RSA® ID Plus Subscription Plans

A complete, secure identity platform—for everyone, everywhere

Whether you're working in cloud, hybrid, or on-premises deployments, ensure that you have the right level of assurance, protection, and controls by choosing any of the four RSA® ID Plus subscription plans that work best for you.

Trusted identity your way

ID Plus subscription packages provide all the capabilities you need in one solution to secure your business. Select the subscription package and add-ons that your business needs. You can also expand your ID Plus subscription plan with new add-ons as your needs change:

ID Plus C1

Authentication and access for users and applications in the cloud.

Cloud-only deployment that supports multi-factor authentication (MFA), attribute- and role-based access controls, single sign-on, web portal, and other capabilities.

Add-ons

ID Plus E1

Hybrid authentication for supported users and applications across all environments.

ID Plus E1 can be deployed across cloud, hybrid, and on-premises environments and supports MFA, attribute- and role-based access controls, Web and Agents / RADIUS integrations, cloud/on-premises directory, and more.

Add-ons

ID Plus E2

Hybrid authentication and access for users and applications across all environments.

ID Plus E2 can be deployed across cloud, hybrid, and on-premises environments and supports MFA, attribute-, role-based, and adaptive access controls, Web and Agents / RADIUS integrations, cloud / on-premises, and custom directory capabilities, customizable web portal and SSO for unlimited applications, customizable advanced workflows—including secure enrollment via ID verification—and more.

Add-ons

Benefits

- A complete identity and access management (IAM) solution
- The only authentication and access management solution that can extend across cloud, hybrid, and on-premises configurations
- Security-first capabilities that protect against the most frequent and highest-impact cyberattacks
- Attain operational efficiency at lower costs

ID Plus E3

Hybrid authentication and access, premium support, adaptive access controls, RSA® Risk AI, RSA® Mobile Lock, web proxy, secure enrollment via ID verification, and additional features across cloud, hybrid, and on-premises environments.

ID Plus E3 is the most comprehensive package, represents the best value, and includes premium features that are only available as add-ons in the other subscription packages.

Add-ons

ID Plus add-ons

	<p>RSA® Mobile Lock: Detects critical threats to a mobile device and restricts the user's ability to authenticate until the threat issue is resolved.</p>
	<p>RSA® Risk AI: Provides the most sophisticated level of automated access security by intuitively determining user risk before granting access to systems and data, keeping bad actors out and letting trusted people in.</p>
	<p>Premium Support: Get direct access to a team of support experts who can provide a heightened level of assistance and guidance, and faster response and resolution times.</p>
	<p>Web Proxy: Advanced integrations and standards, including Trusted Headers.</p>
	<p>Adaptive Access: A more flexible and context-dependent approach to access, with conditional policies based on dynamic elements including device, network, and geographic location.</p>
	<p>DS100: The RSA DS100 authenticator supports FIDO2 and OTP authentication on one device with secure, field-updatable firmware.</p>
	<p>SMS/Voice: One-time password (OTP) delivered on-demand through SMS / voice telephony credits.</p>
