

# CISO Advisory Service

Even CISOs need support, and often a second pair of hands is a welcome addition to the team. This **specialized** service is designed to offer clients access to the best of Checkpoint consultants in a **truly** flexible and bespoke manner.

A Chief Information Security Officer (CISO) plays a pivotal role in an organization's cybersecurity strategy. However, not every company has the resources to employ a full-time CISO. This is where CISO Consulting Services come in.

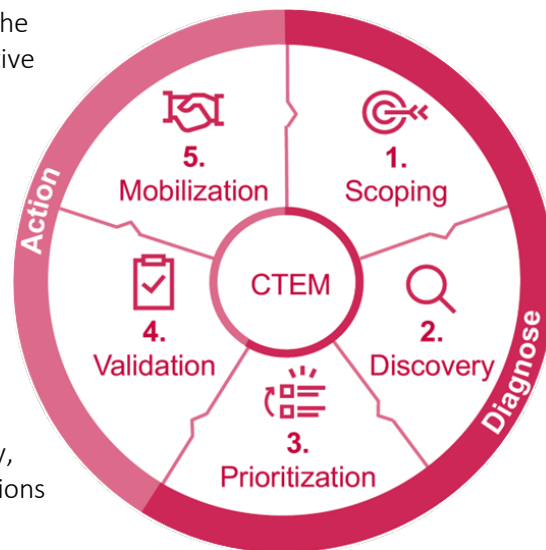

Check Point provides expert **Virtual CISO consulting services** to organizations of all sizes and industries. Our seasoned CISOs and Enterprise Security Architects offer strategic guidance, cybersecurity expertise, and leadership to help you effectively protect your digital assets.

## Benefits

- **Expert Advice:** Our CISOs and expert advisors have years of experience in diverse industries, providing you with a wealth of knowledge and insights.
- **Trusted Advisor:** Knowing that there is a dedicated professional C-level executive ready to help you at any time, with any problem means you can take on those extra tasks and offload those that consume resources inefficiently.
- **Flexible:** Each vCISO engagement is unique and customized to your specific requirements. We match skills from our talent pool to your organization reducing on-boarding time and helping you make the most efficient use of your resources. Each request from a client will first be assessed for effort and mutually agreed upon before any work is completed.
- **Cross-functional:** Your vCISO acts as a proxy for the combined knowledge of the Check Points 30 years of cyber security knowledge. We understand that there are many specialist cyber security subject matters; however, we are confident that through our networks and experience, we will be able to help you navigate the most complex and challenging questions in our field.
- **Meet the experts:** We know that CISOs like to engage with their peers, which is why, as a vCISO customer, you will be invited to engage with your peers within our network, Check Point sensor leaders as well as our own field CISO teams. These personal invitations are made to encourage though leadership and knowledge sharing – please note no sales people are allowed!
- **Dedicated to Excellence:** We are committed to delivering the highest quality consulting services, placing your organization's security at the forefront. As your organization develops and matures, we will offer you the opportunity to interface with different Check Point vCISOs, allowing us to ensure that your vCISO is delivering exactly what you need when you need it.

# Methodology – CTEM

Virtual Chief Information Security Officer (vCISO) services, grounded in the Continuous Threat Exposure Management (CTEM) model, offer a proactive approach to cybersecurity, ensuring that organizations are perpetually prepared against evolving threats. Through the CTEM framework, vCISOs systematically identify, assess, and prioritize vulnerabilities in real-time, enabling businesses to focus on critical exposures before they can be exploited. This model emphasizes the importance of continuous monitoring and adjustment of security strategies, allowing vCISO services to offer tailored recommendations that evolve alongside the threat landscape. By leveraging cutting-edge technologies and methodologies, vCISOs employing the CTEM model can efficiently allocate resources to where they are most needed, ensuring optimal protection against potential cyber incidents. Ultimately, the integration of vCISO services with the CTEM model equips organizations with a dynamic, resilient cybersecurity posture that mitigates risks and enhances their defensive capabilities in an ever-changing digital world.

## Virtual CISO Services:

- **CISO Strategy Development:** Our experienced CISOs will help create a comprehensive cybersecurity strategy tailored to your business objectives and based on open frameworks such as NIST or ISO.
- **Cybersecurity Risk Management:** Identify vulnerabilities, assess threats, and develop strategies to mitigate risk. Our Enterprise Architects and Consultants guide you in implementing effective risk management practices to safeguard your organization. Your CISO can even develop and run your risk register.
- **External Attack Surface Management:** Discover, Assess and Test your external attack surface to reveal critical vulnerabilities and remediate based on the business risk.
- **Red Teaming:** pen testing external and internal assets and Breach Attack Simulation
- **Threat Intelligence Services:** provide critical insights into potential and active threats facing organization
- **Security Governance and Compliance:** Stay compliant with industry standards and regulations. We help you establish and maintain robust security governance frameworks and ensure adherence to legal requirements. Where required, your dedicated expert advisor will develop programs and processes on your behalf.
- **IT Service management:** All our CISOs are well versed in ITSM processes and procedures and are able to augment or run these programs for you. If you need someone to design a change control process for you or support your CAB, we have a vCISO that can help.
- **Technology Evaluation:** Stay at the forefront of cybersecurity technology. Our CISOs assess, recommend, and help you implement the latest security tools and solutions to protect your infrastructure.

**Most relevant roles:** CISO, CISO, directors, SOC managers, and enterprise security architects
