

MAKE ANY MISSION POSSIBLE WITH NETAPP AI SOLUTIONS

TURN DATA

Modern governments rely on modern technologies to keep them safe and to provide the services their citizens demand. To carry out any mission—from mundane paperwork to top-secret intelligence—data is a key strategic asset.

INTO YOUR BIGGEST ADVANTAGE

By combining mountains of data with the analytic and predictive power of artificial intelligence, government organizations can enhance security, boost safety and efficiency, and deliver advanced public services.

With AI as their greatest ally, public sector organizations around the globe can make any mission possible.

\$41.1B

US\$41.1B can be saved annually with AI-based paperwork automation.

85%

AI can prevent 85% of all security breaches.

20%+

Integrating AI into military supply chain management can help increase efficiency by 20% or more.

91.5%

AI models are 91.5% accurate in identifying and tracking water pollution, keeping public outbreaks of E-coli and other water-born illnesses at bay.

Is your data AI-ready?

99% of government agency leaders agree that investing in safe and effective AI is essential to fulfilling their mission. To be successful, they need a modern, intelligent data infrastructure that can support AI—one that enables organizations to address three major data hurdles to fully embracing AI:

DATA IS EVERYWHERE

DATA CAN BE HELD BACK BY SILOS OR BOTTLENECKS

DATA IS CONSTANTLY UNDER THREAT

Break through AI red tape with AI-ready data

Get your data AI-ready with highly performant intelligent data infrastructure built on the most secure storage on the planet. NetApp® solutions lead the industry in high-performance, massively scalable, unified data storage that can power every segment of the hybrid AI data pipeline—all while delivering the simplicity, security, and governance required to mitigate risk and confidently deploy safe, responsible AI.

Scalable performance: Accelerate the entire AI pipeline

Power all your AI use cases, regardless of data type or workload, on any cloud with high-performance, highly scalable NetApp solutions.

Eliminate silos by consolidating AI workloads and existing enterprise apps, without tradeoffs.

Intelligent and integrated: Seamlessly mobilize all your data

Use AI-optimized data management to instantly classify, access, move, and serve data across hybrid multicloud environments.

Streamline operations with AIOps-driven automation and unified, multicloud control.

Prevent vendor lock-in and avoid having to choose between foundational models with solutions that natively integrate with AWS, Azure, and Google Cloud.

Trusted and secure: Provide unmatched data security

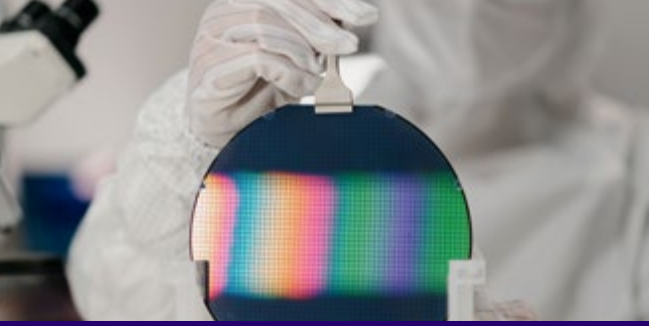

Protect AI workloads with the only hardened enterprise storage validated to store top-secret data.

Keep models and data secure via real-time, AI/ML-based ransomware protection and guaranteed recovery.

Enable safe, responsible AI and meet data privacy and governance requirements.

NETAPP AI SOLUTIONS IN ACTION

The University at Albany is using NVIDIA DGX Cloud supercomputing with more than 5PB of NetApp storage to accelerate their AI workloads and elevate their research programs. The initiative, called AI Plus, significantly expands the AI supercomputing resources available for teaching and research in New York well beyond traditional STEM applications to include the arts and humanities.

Ready to get started?

Whether you're hunting cyberthreats, operating military drones, tracking infectious diseases, or monitoring bacteria in water supplies, AI puts success at your fingertips. If you're ready to start your own AI transformation, you've come to the right place. NetApp has the proven experience and the know-how to empower U.S. public sector organizations to use their data to unlock the power of AI and make any mission possible.

About NetApp
NetApp is the intelligent data infrastructure company, combining unified data storage, integrated data services, and CloudOps solutions to turn a world of disruption into opportunity for every customer. NetApp creates silo-free infrastructure, harnessing observability and AI to enable the industry's best data management. As the only enterprise-grade storage service natively embedded in the world's biggest clouds, our data storage delivers seamless flexibility. In addition, our data services create a data advantage through superior cyber resilience, governance, and application agility. Our CloudOps solutions provide continuous optimization of performance and efficiency through observability and AI. No matter the data type, workload, or environment, with NetApp you can transform your data infrastructure to realize your business possibilities. www.netapp.com
